

Advanced Water Filtration Technology for Luxury Buildings

1. General location view:

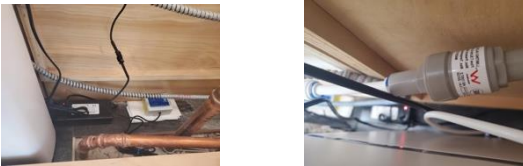

When we faced a customer that had a very strict demand for its water filtering system, we learned we had to do our best. Here's how we tackled the challenge

2. Client's Requirements:

- Installation of the RO system that won't take too much space
- Not only filter but also mineralize and ionize water

3. How it Looked During Installation:

4. Features that our client desired for the installation:

- Limited Space Complications Related to Faucet Installation
- High Water Pressure
- Meeting Building Management Standards

5. Results:

That is how it looks after finishing

6. The Customer Says:

"The installation was completed with no disruption and the system fit perfectly into the allocated two-piece space. It's really cool that they suggested adding a leak stop sensor for added protection was a smart move.

Their innovative, smart approach to solving non-standard problems is commendable. I highly recommend Tankless Filter for their exceptional water filtration solutions."
